

AN EFFECTIVE AT HOME TREATMENT

DAILY PROTOCOL

CALMS AND SOOTHES DAMAGED SKIN

MAINTAIN & BALANCE

HELPS IN DISSOLVING BLACK AND WHITE HEADS, REMOVING DEAD SKIN CELLS AND PREVENTING NEW BLEMISHES FROM FORMING

Camphor Soufflé is a unique Deep-Pore whipped cleanser, which plays an indispensable role in relieving excessive oiliness in oily and blemished skin. This powerful, yet pH balanced, facial wash instantly softens tap water and helps to dissolve the heavy sebum that usually clogs pores in oily and blemished skin. Leaves the skin thoroughly cleansed and ready for treatment products. It is recommended for excessively oily and blemish prone skin types. #101

Eucalyptus Astringent Toner is a very effective facial astringent toner recommended only for oily and blemished skin. Its balancing pH helps to fight bacteria, to reduce oil secretion, and to dry up blemishes. The high content of Glycolic Acid and Ammonium Glycolate (15%) effectively accelerate the exfoliation of the skin's dead cells, diminish superficial sun damage and reduce the appearance of fine lines. Apply with cotton several times daily after cleansing or before applying day cream or make-up. #G-207

Glycolic Gel GX-50 is very beneficial for non-sensitive, normal to oily, and blemished skin types. It effectively helps to fight bacteria and increases the rate of natural dead skin exfoliation, while helping to promote moisture by stimulating the renewal of native skin collagen. Apply to the face twice daily. Repeated use will help reduce oiliness, clearing up skin problems, and reducing the appearance of fine lines. Follow with the appropriate Day Cream. #G-330

Vitamin-B Cream is a highly effective moisturizer and under make-up cream for normal-to-oily, oily, blemished and problem skin. A complex of natural botanical extracts, vitamins, and amino acids help to moisturize and balance the skin, while natural Vitamin B Complex (Yeast Extract) helps to regulate oil gland secretion to reduce the possibility of clogged pores, inflammations, and breakouts associated with an oily skin condition and the use of make-up products.
