

HELPS TO REDUCE AND IMPROVE THE APPEARANCE OF BLEMISHES

# SPECIAL TREATMENT

CONTROLS OIL AND BACTERIA

## CONTROL & PREVENT

A TRADITIONAL EUROPEAN TREATMENT SOLUTION THAT HAS HELPED COUNTLESS PEOPLE WITH THEIR COMPLEXION

**Enzyme Peeling Cream** is a gentle exfoliating cream for removing dead skin cells. It is recommended for all skin types. Use one to two times weekly followed by blemish control mask. #109

**Bio-Drying Lotion** is an excellent skin care treatment for blemished skin. It helps to dry up blemishes and reduce irritation. It helps to prevent growth of the blemish. Shake well, apply only to the blemish (with a cotton swab) several times a day. #701

**Blemish Control Astringent** is highly effective, and recommended only, for oily and blemished skin types. Containing Yeast Extract Complex (Vitamin B) and Salicylic Acid (BHA), it helps to normalize the pH balance of the skin and effectively regulate oil gland secretion. Use two to four times weekly followed by blemish control mask. #705

**Blemish Control Masque** is a traditional European mask that is an exceptional deep cleansing and purifying treatment recommended especially for oily and blemished skin. It's perfect combination of finely milled clays, pure essential oils, and ichthammol draws out impurities, minimizes pores, and helps to calm irritated blemishes. Use one to two times weekly followed by blemish control mask. #709

**Caution:** Always consult your skin care professional prior to starting treatment. Your skin care professional will recommend a course of treatment for you based upon the individual factors associated with your skin type and condition. The protocol listed is only a suggested treatment plan for oily and blemished skin based on past results and most popular items for this skin type. Your skin type and condition may require a modified treatment plan which may include only some of the items listed.

**BLEMISHED AND OILY SKIN ONLY**
