

WITH VITAMIN C, TISSUE RESPIRATORY FACTORS AND NATURAL PLANT EXTRACTS

OXYGEN TREATMENT MASK

REVITALIZING AND RESTORATIVE SALON STRENGTH TREATMENT

FOR IN-SALON PROFESSIONAL USE ONLY

This active powder mask is formulated for an effective revitalizing and restorative salon strength treatment. Fine powdered clays perform deep cleansing, while Vitamin C, tissue respiratory factors (yeast oxygen treatment), super oxide dismutase (anti-free radical treatment) and a blend of natural plant extracts (in powder form), help to restore sun damaged, under-moisturized, dull, and maturing skin. Directions: To activate the masque, mix approximately 1 teaspoon of powder with an adequate quantity of purified water or toner/astringent, appropriate for client's skin type. Apply after deep pore cleansing and mechanical exfoliation (scrubs or peeling creams). Leave on for 10-15 min., then rinse with tepid water. For a super active oxygen treatment (not for sensitive skin) rather than water or toner/astringent, add 3-5 drops of 3% hydrogen peroxide to powder. The mask will begin to heat up, rise, and slightly fizz. Please allow enough room in your mixing container for this to occur (the container should be at least 3 times larger than used for a regular mask). Contains: Zinc Oxide, Kaolin, Live Yeast Cell Derivative, Bentonite, Guar Gum, Superoxide Dismutase, Powdered Aloe Vera and Chamomile, L-Ascorbic Acid, Citrus Oils. No.653

**HELPS TO RESTORE SUN DAMAGED,
UNDER-MOISTURIZED AND DULL SKIN**
