

HERBAL PEELING GEL

This gentle and soft exfoliator is abrasive particle free, and targets only the dead skin cells. Removes them gently without scratching live, healthy cells. Helps to minimize pore size and brighten skin tone. Prepares the skin to receive moisturizing and nourishing treatments. For all non-acne skin types.

Key Ingredients: Aloe Vera Gel, Glycerin, Chamomile Extract, Sodium PCA, Papaya Extract, Pineapple Extract, Bromelain Enzymes, Papain Enzymes, Essential Oils, Glycosaminoglycans, Sea Buckthorn Oil.

Directions: Apply over cleansed, dry skin, avoiding eye area. Let remain on the skin until the gel melts (5 to 10 minutes). You will feel the enzymes begin to work. The gel will begin to melt and liquify indicating that it is loosening your dead skin cells. When the product is completely liquid, gently rub your skin in a circular motion for 2-3 minutes. Rinse face thoroughly with warm water after using. Use once or twice weekly. Can be used as a part of at-home mini facial regimen when followed by mask, serum, and a moisturizer.

Professional in salon use: Can be used after cleansing and either prior or after steam to help root out impurities, blackheads and improve skin texture. Helps to improve the penetration of following treatments. This is a medium strength exfoliator.

Key ingredient functions and product benefits: Bromelain Enzymes, Papain Enzymes and Glycosaminoglycans in this resurfacing treatment gently exfoliate the skin to improve the appearance of fine lines, age spots, freckles, and rough skin. Sodium PCA and Glycerin provide moisture binding activity. Extracts of Chamomile, Papaya and Pineapple help to tone, refresh and purify. Sea Buckthorn Oil and Aloe Vera help to soothe and protect the skin. Scented with pure essential oils.* 110 *Organic
