

HA-COLLAGEN

This highly concentrated anti-aging, moisture binding and skin repairing facial treatment contains hyaluronic acid microsphere sponge technology to help re-plump and "fill in" wrinkles. Dehydrated for greater penetration, these spheres are "micro-injected" into the tissues, where they swell up with water and increase in volume, resulting in smoother and more hydrated skin relief.

Key Ingredients: Aloe Vera Gel, Glycerin (Vegetable), Soluble Collagen (Marine), Palmitoyl Oligopeptide, Palmitoyl Tetrapeptide-7, Corn Extract, Wheat Extract (Placenta), Tocopherol, Allantoin, Sodium Hyaluronate, Sodium PCA.

Directions: Apply directly to the skin after cleansing, and prior to the application of any other facial product. Especially effective around eyes, forehead and upper lips. May be used on the entire face and neck. Use twice daily. Follow with moisturizer. Recommended for all non-problem skin types.

Professional in salon use: This advanced, silky textured treatment serum combines active anti-aging peptides with skin moisturizing and wrinkle filling and plumping ingredients. Could be used during facial treatment by applying a thin layer to cleansed and moistened skin prior to final treatment moisturizer. For sensitive skin types dilute a small amount of serum with purified water (50/50 ratio) prior to application. Could be added directly into facial creams and masks (a few drops) immediately prior to skin application (helps to boost product performance). Could be used for In-salon anti aging and lifting treatments by incorporating with other products (Vitaplex C Cream, Revitalizing Cream, Bio-Effective Cream, Collagen Day Cream, Skin Recovery Mask, Collagen Mask, Placental Mask).

Key Ingredient functions and product benefits: Pure marine collagen effectively helps to diminish wrinkles and age lines while providing a skin tightening and plumping effect by helping to tighten the cell connections. Placenta extract (botanical origin) is effective in restoring skin elasticity and moisture while increasing cell renewal to provide a smooth and even texture to the skin. Multi-Peptides help to increase Collagen and Elastin production to further reduce and slow the formation of lines and wrinkles. Corn derived live cells help to improve the complexion of skin by providing it with nutrients. Makes skin feel soft, light, and velvety. Absorbs quickly and leaves a smooth, non-greasy finish. When used prior to makeup, helps to achieve an even application. #502
